

AMBULANCE ANNUAL INDUSTRY STATEMENT 2011

This statement provides a summary of ETITO's key activities for the ambulance sector in 2011. ETITO's activities are reviewed annually to ensure that we continue to be responsive to sector needs, foster high levels of training achievement, and provide the support services needed by ambulance service providers to achieve success. Our activities may need to be adapted during the year to take into account emerging priorities and the operational environment.

Delivering industry training to support achievement

ETITO will continue to work closely with ambulance service providers to increase our understanding of the needs of the sector in order that we can best support training and assessment to national qualifications. In particular, we will work with the ambulance sector to maintain high credit achievement rates.

ETITO will continue to moderate assessment to ensure national consistency. This includes the conduct of moderation and assessment forums to share knowledge, peer moderation events and the conduct of workplace assessment evaluations.

Providing leadership on skills and training needs

ETITO will invest in research that identifies strategic training priorities for the ambulance sector. In particular, ETITO will continue to monitor developments associated with the Health Practitioners Competency Assurance Act and the ongoing dialogue about paramedic regulation to ensure that the national training system remains responsive to the changing landscape.

ETITO will continue to invest in its relationships with the Ambulance Advisory Group and Education and Training Subcommittee, sharing and gaining further sector intelligence and providing leadership on matters relating to current and future skill needs.

ETITO will continue to support the Mayoral Taskforce for Jobs in its industry graduations that celebrate trainee success.
