

# Pre-Hospital Emergency Care unit standards registered

**15 April 2009**

ETITO is pleased to announce that the review of the Pre-Hospital Emergency Care [PHEC] unit standards has been completed and they've now been registered on the National Qualifications Framework.

As a result of this review the following changes were made to better reflect industry, assessment and moderation requirements:

- Unit standards 14470 and 14471 [Level 4] have been replaced by new unit standard 25412 [Level 3]
- Unit standard 14472 [Level 4] has been replaced by new unit standard 25411 [Level 3]
- Unit standard 14473 has changed from Level 4 to Level 3

These unit standards are published on the New Zealand Qualifications Authority website.

While being part of the ambulance qualification pathway, due to the broad usage of these pre-hospital emergency care unit standards, ETITO consulted widely during this review which involved other standard setting bodies [SSBs], training providers, industry, and community groups.

ETITO would like to take this opportunity to thank the members of the industry consultation review group who took the time and effort to complete the review of these unit standards. Their contribution has helped ensure the standards will continue to meet the current and future skill needs of the industry.
