

Bright Sparks win big internationally!

Bright Sparks Ben Mulholland and Abhilash Kamineni have won 1st and 2nd respectively, in the engineering category of the 2009 Taiwan International Science Fair!

Ben and Abhilash attended this exclusive international event when, after outstanding achievements in the 2008 Bright Sparks Competition, they were nominated to attend The Royal Society of New Zealand's Realise the Dream programme and put forward to travel to the Taiwan International Science Fair.

"This is a fantastic achievement for both young Bright Sparks and indeed New Zealand. With this win we have reached a new pinnacle regarding the international achievements of Bright Sparks and naturally I am delighted," says Ross Petersen, ETITO Training Manager - ETITO in Schools.

We'll keep you posted with more information about this wonderful success, when Ben and Abhilash return from their trip abroad.

Congratulations Ben and Abhilash!
