

Strategic training plan for the electrotechnology industry

January 2009

Strategic training plan for the electrotechnology industry 2009-2011 [2008 version]

ETITO developed the 2008 version of the electrotechnology industry strategic training plan to inform the design and maintenance of services, qualifications, qualification pathways and training provision to meet industry needs.

Strategic training plans are public documents that represent ETITO's contribution to the ITP regional planning process and inform ETITO's planning of the following activities, systems and processes:

- ETITO investment plan
- ETITO activity plans
- ETITO qualification development and review processes
- ETITO quality assurance systems
- ETITO industry training services

Industry consultation was of central importance to the development of the 2008 version of the strategic training plan and advisory group input was sought to identify industry representation for the consultation group. The continued development of the electrotechnology strategic training plan is a priority for ETITO and so the 2008 version will be reviewed and updated from 2009 onward.
